

NEXTRACT

Data Solutions

Enterprise Web Scraping & Data Extraction API

hello@nextextract.dev | www.nextextract.dev

THE PROBLEM

Businesses Need Data But Can't Access It

\$150K+ Wasted Annually

Companies waste resources on failed scraping attempts and unreliable data sources

67% Failure Rate

Most in-house scraping solutions fail due to anti-bot measures and IP blocks

3.2x Slower Development

Building reliable scraping infrastructure takes months, delaying time-to-market

89% Quality Issues

Data quality problems lead to poor business decisions and lost opportunities

THE SOLUTION

Product + Service Complete Data Solutions

PRODUCT

01

Self-Service API

Developer-friendly REST API for instant data extraction

- Pay-per-request pricing
- Instant integration
- Full documentation

SERVICE

02

Custom Scraping Solutions

Tailored solutions built specifically for your needs

- Dedicated engineering team
- Custom data pipelines
- Ongoing maintenance & support

03

Managed Data Feeds

Turnkey solutions with scheduled delivery and monitoring

04

Consulting & Strategy

Expert guidance on data extraction strategy and implementation

OUR APPROACH

Product + Service Hybrid Model

PRODUCT OFFERING

Self-Service API

- **Instant Access**
Start extracting data in minutes
- **Pay-as-you-go**
Scale up or down based on usage
- **Full Control**
Integrate into your existing workflows

Perfect for:

Developers, startups, standard use cases

SERVICE OFFERING

Custom Solutions

- **Tailored Development**
Built specifically for your unique requirements
- **Dedicated Team**
Expert engineers assigned to your project
- **Ongoing Support**
Maintenance, monitoring, and optimization

Perfect for:

Enterprises, complex requirements, mission-critical data

MARKET OPPORTUNITY

\$7.1B Market Growing at 18.4% CAGR

\$7.1B

Global Web Scraping Market Size (2024)

- 18.4% CAGR through 2030
- \$20B+ projected by 2030
- 500M+ websites globally

Target Segments

E-commerce & Retail

Price intelligence, competitor monitoring

Financial Services

Market data, news aggregation

Real Estate

Property listings, market analysis

Travel & Hospitality

Pricing, availability, reviews

Dual Revenue Model

PRODUCT REVENUE

API Usage

Pay-per-request pricing model

\$0.01 - \$0.10

per request

Scalable, self-service

COMPETITIVE ADVANTAGE

Why Nextract Wins

99.9%

Uptime SLA

Enterprise-grade reliability with guaranteed uptime

10x

Faster Delivery

Advanced infrastructure delivers data 10x faster than competitors

8 Years

Experience

Proven track record with 500+ clients across 45+ countries

24/7

Support

Dedicated support team with average 5-minute response time

TRACTION

Proven Results

500+

Active Clients

Including Fortune 500 companies and fast-growing startups

- 45+ countries served
- 4.9/5 average rating
- 98% customer satisfaction

Key Wins

E-commerce Giant

\$500K ARR contract for price intelligence

Travel Platform

\$200K ARR for real-time availability data

Financial Services

\$300K ARR for market data aggregation

CASE STUDIES

Real Impact

E-COMMERCE | CUSTOM SOLUTION

Amazon Reviews Analysis

Built custom scraping solution for dairy company to analyze 3,217 reviews and identify market gaps

48hr

Time to Value

#1

Market Position

QUICK COMMERCE | CUSTOM SOLUTION

Delivery Zone Mapping

Developed custom street-level mapping solution reducing failed deliveries by 61%

Tailored for Your Needs

EXAMPLE 1

Complex Multi-Source Aggregation

Built custom pipeline aggregating data from 50+ sources with different formats, APIs, and authentication methods

- Custom parsers for each source
- Unified data format
- Real-time synchronization

EXAMPLE 2

Enterprise Integration

Custom solution integrated directly into client's ERP system with automated workflows and data validation

- Direct API integration
- Automated data processing
- Custom reporting dashboard

EXAMPLE 3

Mobile App Data Extraction

EXAMPLE 4

White-Label Platform

Developed custom solution to extract data from mobile-only apps using reverse-engineered APIs

- Mobile API access
- Real-time data capture
- 92%+ accuracy rate

Built complete white-label data extraction platform for SaaS company to offer to their customers

- Full rebranding
- Custom UI/UX
- Multi-tenant architecture

Core Team

Engineering Team

15+ developers specializing in scraping infrastructure

Data Science

ML engineers building AI-powered extraction models

Customer Success

Dedicated team ensuring 98% satisfaction rate

Custom Scraping Solutions

Not every data need fits a standard API. That's why we offer **custom scraping solutions** built specifically for your unique requirements.

01

Custom Development

Dedicated engineering team builds solutions tailored to your specific data sources, formats, and workflows

- Complex website structures
- Proprietary data formats

02

Managed Services

We handle everything: infrastructure, monitoring, maintenance, and optimization

- 24/7 monitoring & alerts
- Automatic updates & fixes

- Integration with your systems

- Performance optimization

03

Consulting & Strategy

Expert guidance on data extraction strategy, architecture, and best practices

- Data strategy consulting
- Architecture design
- Best practices & training

04

White-Label Solutions

Rebrand our infrastructure as your own for your customers

- Full white-label option
- Custom branding
- Your customer support

Growth Strategy

PRODUCT STRATEGY

01

Product-Led Growth

Free tier → Self-service API → Enterprise upsell

- Developer-focused marketing
- API documentation & tutorials
- Community building

SERVICE STRATEGY

02

Enterprise Sales

Direct sales team targeting Fortune 1000 companies

- Custom solution demos
- Case study presentations
- Executive relationship building

03

Partnership Channel

04

Referral Program

Integrations with Shopify, Salesforce, AWS
Marketplace

Incentivize API users to refer enterprise custom
solutions

Marketing Channels

Content Marketing

Technical blogs, case studies, API documentation

Events & Conferences

API conferences, data engineering summits

Developer Community

GitHub, Stack Overflow, Dev.to, HackerNews

Paid Acquisition

Google Ads, LinkedIn Ads targeting developers

Investment Opportunity
